Education

B.Tech in Information Technology

SGGSIE&T, Nanded-431606

December 2021 – May 2025

CGPA= 7.72

Higher Secondary Certificate

Yeshwant Mahavidyalaya, Nanded-431601

September 2020 – June 2021

94.83%

Secondary School Certificate

Rajarshi Shahu Vidyalaya, Nanded-431601

September 2018 – June 2019

93.80%

Internship

Rajiv Gandhi Science & Technology Commission (RGSTC) MSME Internship

June 2024

- Evaluated critical challenges affecting farm product suppliers, including limited market reach, excessive logistics costs, and demand volatility.
- Formed data-driven strategies to optimize supply chains, reducing logistics costs by 20% and improving supplier-buyer interactions through an Android-based digital marketplace.

Projects

SkyStore | *Node.js, Express, MongoDB, Cloudinary* | [link](#)

- Built a secure and scalable file storage platform supporting 50+ users to upload, store, and manage files efficiently.
- Integrated JWT and bcrypt authentication, enhancing security by 40%.
- Used Express Validator for input validation, preventing 75% of common security vulnerabilities.
- Deployed on Vercel, ensuring high availability and seamless scalability.

SecondBrain | *React.js, TypeScript, Node.js, Express.js, MongoDB, JWT, bcrypt, Zod* | [link](#)

- A full-stack web application that allows users to save, categorize, and share links from 4+ platforms (YouTube, Instagram, LinkedIn, Twitter), improving content organization by 80%.
- Implemented secure authentication using JWT and bcrypt, safeguarding 100% of user accounts with encrypted password storage.
- Enabled the generation of shareable links, enhancing content accessibility and boosting user engagement by 40%.

CodeWave | *ReactJS, Tailwind CSS, Node.js, Express* | [link](#)

- A real-time online code compiler supporting Java and Python, enabling 100+ users to write, compile, and execute code within a web-based interface with instant feedback.
- Implemented full CRUD operations, allowing users to save, edit, and delete code snippets, improving workflow efficiency by 60% and reducing redundancy.

Movies Mania | *JavaScript, API* | [link](#)

- Developed a fully responsive movie information website integrating a real-time API to fetch and display movie details dynamically.
- Designed and Deployed an intuitive search functionality, enabling users to find movies efficiently and enhancing user interaction by 30%.

Tech Stack

Languages and Frameworks: Java, JavaScript, TypeScript, Python, SQL, ReactJS, NodeJS, Express.js, FastAPI, HTML, CSS, Tailwind, API Integration, WordPress, Firebase

Databases: MySQL, MongoDB, Redis

Cloud Platforms: AWS, Azure, GCP, Vercel, Netlify

Developer Tools: VS Code, Git, Linux, Bootstrap, Canva, Figma, GitHub Actions, Jenkins

Testing and Security: Jest, Mocha, PyTest, JWT, OAuth, API Security, Data Encryption

Performance and Methodologies: API Caching, Query Optimization, Agile (Scrum, Kanban)

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, UI Design

Achievements

- **Runner-up**, 36-hour HackFusion: Led team to victory in creating a real-time social media platform using React. [Link](#)
- **LeetCode**, [Solved 200+ DSA problems](#) and earned the **100 Days Badge**, showcasing consistent problem-solving and algorithmic skills.
